

## Heart Failure Program

Our physicians are internationally recognized and widely published thought leaders in heart failure, heart transplantation, and mechanically assisted circulation, and delivering and implementing progressive care management.

### Recognized Worldwide as Leaders in the Management of Heart Failure

Our practice is involved with all clinical aspects of heart failure management, including pharmacologic and electrical treatments for heart failure, mechanical circulatory support devices, and cardiac transplantation.

### Nationally Recognized Heart Care

The Texas Heart Institute Center for Cardiovascular Care doctors are leaders in treating patients with all stages of heart failure and have spearheaded some of the most innovative treatments in the medical field today.

We welcome our local, regional, and global community by ensuring they have access to the best care for their needs.

The Texas Heart Institute at Baylor St. Luke's Medical Center Recognized Among Nation's Best in Cardiology & Heart Surgery by U.S. News & World Report

### Research to Improve Treatment Outcomes

Through our practice, you may have the opportunity to participate in clinical trials. The Texas Heart Institute's clinical trials include experimental treatments that may lead to better patient care for people with heart valve disease.

As the world's population ages, the number of people in our communities suffering heart failure will rise significantly, making our work in collaboration with The Texas Heart Institute research teams even more critical.
